Leading Edge Materials completes near-mine drilling at Woxna graphite project

12 November 2026

Leading Edge Materials Corp. (TSXV: LEM) announced the completion of a five-hole, 469.3-metre first-pass diamond drilling programme at the Woxna Graphite mine in Sweden, designed to test whether graphite occurrences at Kringeltjärn, Råttjärnamyren and Svartboberget form part of a larger system surrounding the existing Kringelgruvan mine. The programme ran from 8 September to 3 November 2026. Graphite was observed in all five holes, with graphite-bearing intervals intersected in four of them. At Kringeltjärn East, hole 26DDKRI004 returned two graphite-bearing intervals of 13.4 metres (26.20–39.60 m) and 11.73 metres (52.32–64.05 m) down-hole, with larger flakes observed in the lower interval. At Råttjärnamyren, hole 26DDKRI003 intersected multiple graphite-bearing intervals from 76.0 metres down-hole, shallower than anticipated, supporting the interpretation of a relatively shallow-dipping unit extending towards Svartboberget.

A total of 44 metres of core was sampled and submitted to ALS Geochemistry in Piteå for total graphitic carbon and total sulphur analysis, with assay results pending. Results will be used to determine the scope of any follow-up drilling, including testing the interpreted extension of the Råttjärnamyren unit towards Svartboberget.

Overview map with the new drillholes and relevant permits.

GOLDSKY RESOURCES · TSXV: GSKR

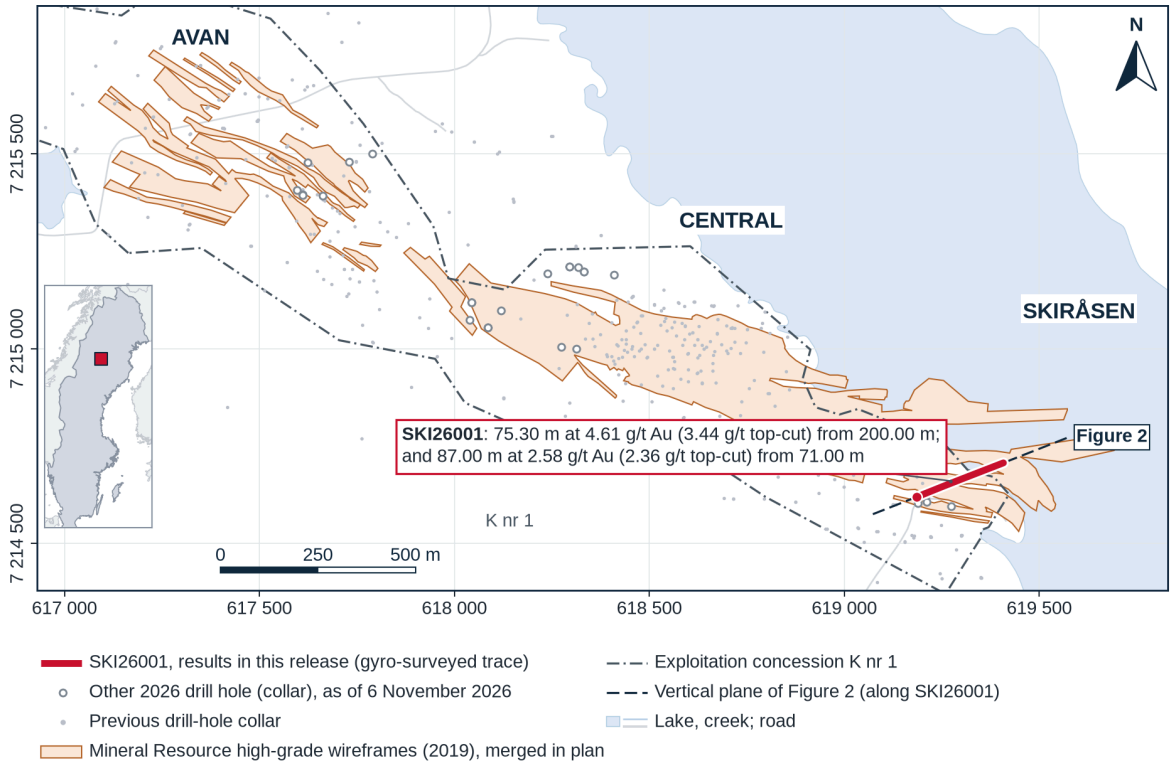

Goldsky Resources reports 75.30 m at 4.61 g/t gold at Barsele Skiråsen

10 November 2026

Goldsky Resources (TSXV: GSKR) reported assay results from drill hole SKI26001, the first infill hole drilled at the Skiråsen zone of its 100%-owned Barsele Gold Project in Sweden. The hole returned two principal intervals: **75.30 m at 4.61 g/t gold** from 200.00 m (30 g/t top-cut grade of 3.44 g/t) and 87.00 m at 2.58 g/t gold from 71.00 m (top-cut grade of 2.36 g/t). The highest single sample, 118.7 g/t gold from 233.00–234.00 m, coincides with the most abundant logged visible gold in the hole. True widths are not yet known for either interval, and assays for 275.30–330.90 m remain pending.

SKI26001 is a shallow infill hole designed to support the conversion of Inferred to Indicated Mineral Resources by testing zone continuity in the upper 270 m; one hole does not establish continuity. As of November 6, 2026, 28 holes totalling 9,105 m had been collared in the company's 25,000 m program across three zones — Central, Avan and Skiråsen — with results for the remaining 22 holes to be reported as received. An updated Mineral Resource estimate is planned for 2027.

EUROBATTERY MINERALS AB · NORDIC GROWTH MARKET: BAT

Eurobattery Minerals engages temporary adviser and prepares EGM

12 November 2026

Eurobattery Minerals (Nordic Growth Market: BAT) announced that Ilari Kinnunen, chief executive of its wholly owned subsidiary FinnCobalt Oy, has been engaged as a temporary operational adviser to support the company's operations and coordination during a current transition period. His role is advisory in nature and does not constitute an appointment as chief executive. The company also said it is preparing to convene an extraordinary general meeting for the election of new board members and a new auditor, with a notice including a date and proposed agenda to be published once those details have been confirmed.

ARCTIC MINERALS AB · NASDAQ FIRST NORTH: ARCT

Arctic Minerals raises SEK 140 million via directed share issue

11 November 2026

Arctic Minerals (Nasdaq First North: ARCT) announced the completion of a directed share issue of 23,333,333 new shares at SEK 6.0 per share, raising **SEK 140 million** before transaction costs — up from the approximately SEK 120 million announced earlier the same day, following strong demand in the accelerated bookbuilding process managed by Pareto Securities. Konwave (Multipartner SICAV – Konwave Transition Metals Fund) and Darren Morcombe were allocated SEK 40 million and SEK 60 million, respectively, joining as new strategic investors.

Net proceeds are intended to fund further drilling at the Hennes Bay copper-silver project in Sweden to increase the mineral resource and move tonnage from Inferred to Indicated category, technical and environmental work toward a Preliminary Economic Analysis for Hennes Bay, and general corporate purposes. The issue raises the total share count from 54,647,222 to 77,980,555, representing dilution of approximately 29.9%. Darren Morcombe's subscription of 2,660,095 additional shares remains conditional on clearance from the Swedish Inspectorate of Strategic Products, expected in December 2026.

TALGA GROUP · ASX: TLG

Talga Group anode achieves over 8,000 cycles in KRI battery test

11 November 2026

Talga Group (ASX: TLG) announced that its Talnode®-C natural graphite anode has achieved over 8,000 cycles to 75% capacity retention in ultra-long-life lithium-ion cells developed by KRI, Inc., a wholly owned subsidiary of Osaka Gas Co., Ltd., approximately five times the cycle life of a conventional cell (approximately 1,600 cycles). KRI has built cells in stacked laminate (10–11 Ah) and 21700 cylindrical (3.0–3.4 Ah) formats with approximately 520 Wh/L energy density, and pilot samples are now available through KRI's customer evaluation programme. Talnode®-C is produced from Talga's Swedish graphite resources using renewable energy. KRI is targeting scale-up to mass production in 2030, though the development timetable is subject to customer evaluation outcomes and there is no assurance the collaboration will result in commercial supply.

GOLDSKY RESOURCES · TSXV: GSKR

Goldsky Resources appoints former Swedish Minister of Enterprise as director

11 November 2026

Goldsky Resources (TSXV: GSKR) announced the appointment of Karl-Petter Thorwaldsson as a non-executive director. Thorwaldsson previously served as Sweden's Minister of Enterprise, a role he held until the 2022 general election, and as Chairman of the Swedish Trade Union Confederation from 2012 to 2020. He has also served on boards and as senior advisor to SSAB and AFA Försäkringar. The appointment is intended to support Goldsky's stakeholder engagement as it works to advance its Barsele gold project in Västerbotten and its Rajapalot project in Finland.

DISTRICT METALS CORP · TSXV: DMX

District Metals partners with Luleå University on Viken pyrite research

10 November 2026

District Metals Corp. (TSXV: DMX) announced a scientific collaboration with Luleå University of Technology's Centre of Advanced Mining and Metallurgy to research pyrite in the Alum Shale Formation at the Viken Property in Jämtland County, central Sweden. District is sponsoring analytical work for an MSc research project, providing fresh drill core from the current drill programme at Viken. The analytical suite is planned to incorporate microanalytical methods including µ-XRF, SEM–EDS, EBSD, LA-ICP-MS and X-ray computed tomography to characterise trace-element budgets and pyrite generations in the Alum Shale. The project aims to investigate relationships between deformation microstructures and trace-element distribution in pyrite and assess their implications for element deportment, mineral processing routes and environmental management, including acid rock drainage protocols.

80 MILE PLC · AIM: 80M

80 Mile plc agrees all-share combination with Greenland Energy Company

12 November 2026

80 Mile plc (AIM: 80M) announced a recommended all-share combination with Greenland Energy Company under which each **80 Mile** share converts into 0.0079485 New Greenland Energy Stock, valuing each share at 1.28 pence based on the closing Greenland Energy price of US$2.14 on 11 November 2026 and implying a fully diluted equity value of approximately £74 million. The offer represents a premium of 71 per cent. to the 0.75 pence closing price on 7 September 2026 and 28 per cent. to the 1.00 pence closing price on 11 November 2026. Upon completion, **80 Mile** shareholders and Greenland Energy stockholders each hold approximately 50 per cent. of the combined company.

The combination, to be effected by a court-sanctioned scheme of arrangement, consolidates 100 per cent. ownership of the Jameson Land Basin project licences in a single Nasdaq-listed vehicle and brings together **80 Mile**'s Disko-Nuussuaq and Dundas projects with Greenland Energy's capital markets access. Greenland Energy held USD 37.4 million in cash as of 30 June 2026, raised approximately US$70 million in April 2026, and has agreed to advance a £3 million convertible loan to **80 Mile** ahead of completion. Completion is expected in H1 2027, subject to shareholder and regulatory approvals.

AMAROQ LTD · NASDAQ ICELAND: AMRQ

Amaroq reports C$65.4 million Q3 revenue and 12.6 koz gold production

12 November 2026

Amaroq Ltd (LSE and Nasdaq Iceland: AMRQ) reported Q3 2026 operational and financial results for the period ended 30 September 2026. Revenue reached **C$65.4 million** in Q3 2026 (Q3 2025: C$12.8 million) and C$121.6 million for the nine months to 30 September 2026, from gold sales of 11,068 oz at an average realised price of USD 4,184/oz. Gross profit was C$45.6 million and net profit C$24.4 million for the quarter, with nine-month net income of C$38.0 million. Cash stood at C$51.5 million at 30 September 2026.

Gold production in Q3 2026 was **12.6 koz** at an average reconciled mill feed grade of 23.6 g/t Au, bringing the nine-month total to 21.6 koz at 21.6 g/t Au, ahead of the guided range of 14–15 g/t. The plant processed 19,316 tonnes with total recovery of 84%, ramping toward 90%. MRE5 for Nalunaq, published 29 July 2026, raised total Mineral Resources to 504 koz of contained gold at 30.35 g/t Au, a 10.6% increase over MRE4. The company reaffirmed full-year production guidance of 25–35 koz, expressing confidence in the mid-range. Growth investment year to date was C$53.6 million. The company also announced a change of auditor from BDO Canada LLP to BDO LLP effective 12 November 2026.

CRITICAL METALS CORP · NASDAQ (US): CRML

Critical Metals Corp completes European Lithium merger, holds US$264.5 million cash

11 November 2026

Critical Metals Corp (Nasdaq: CRML) announced the completion of its acquisition of European Lithium Limited on November 5, 2026, bringing its ownership of the Tanbreez rare earth project in Greenland to 100%. The merger lifted the cash balance to approximately **US$264.5 million** immediately after completion, equal to roughly US$1.36 per share. Total ordinary shares outstanding stand at 194,219,631, with a further 45,536,338 shares held by the European Lithium subsidiary carrying no voting or dividend rights.

The company set a 2027 roadmap centred on delivering a definitive feasibility study for Tanbreez by Q4 2027, with first ore targeted for late 2028 to early 2029, subject to permitting, financing and construction progress. NIRAS is engineering a 500,000 tonne per year mining and processing operation. A binding 15-year offtake agreement with REalloys covering up to 15% of annual concentrate production is in place, and the company said it will seek to convert term sheets with Romanian, Saudi and Ucore partners into binding agreements during 2027. A strategic review of all non-core assets, including holdings acquired through European Lithium, is under way with the aim of directing any proceeds to Tanbreez.

ANORTECH · TSXV: ANOR

AnorTech closes final C$7.55 million share exchange with Greenland Mines

9 November 2026

AnorTech (TSXV: ANOR) announced that it has closed the second and final share exchange with Nasdaq-listed Greenland Mines Ltd. (Nasdaq: GRML) under the share exchange agreement dated June 15, 2026. Greenland Mines acquired 25,168,669 **AnorTech** common shares at C$0.30 per share in exchange for 1,133,268 Greenland Mines shares at a deemed value of approximately US$5,402,393 (C$7,550,600), bringing Greenland Mines' total ownership of **AnorTech** to approximately 19.9% (45,127,172 shares). **AnorTech** in turn now holds 1,451,268 Greenland Mines shares with a current market value of approximately US$5.6 million (C$7.7 million). The **AnorTech** shares issued are subject to a 60-month contractual lock-up, while the Greenland Mines shares issued to **AnorTech** are locked up for 12 to 24 months.
