EUROBATTERY MINERALS AB · NORDIC GROWTH MARKET: BAT

Eurobattery Minerals discloses CEO's final fraud conviction and insider trading suspicion

19 September 2026

Eurobattery Minerals AB (Nordic Growth Market: BAT) announced that its board had been informed that CEO and board member Roberto García Martínez has been convicted of fraud by a judgment in Spain, relating to an investment in a mining operation in Sierra Leone in 2011. The judgment was reviewed by the Tribunal Supremo, Spain's Supreme Court, which delivered its judgment on 21 January 2026, and it is final. The sentence comprises two years' imprisonment, fines and joint civil liability of **USD 3.46 million**. A later enforcement decision by the Audiencia Provincial de Bizkaia,

dated 21 April 2026 and confirmed by a final decision on 29 May 2026, suspended the prison term for a five-year probationary period, conditional among other things on monthly payments and payment of 60 per cent of the civil liability amount; failure to meet the conditions can lead to the prison term being enforced.

The company also said García Martínez has been notified by the Swedish Economic Crime Authority of suspicion of three counts of aggravated insider trading in the company's financial instruments. The board is investigating and considering appropriate measures.

LEADING EDGE MATERIALS CORP · TSXV: LEM

Leading Edge Materials reports Q2 2026 loss and closes private placement tranche

18 September 2026

Leading Edge Materials Corp. (TSXV: LEM) announced financial results for the three months ended April 30, 2026, reporting a net loss of **C$1,357,598** compared to C$1,179,168 in the same period of the prior year. The increase was attributed primarily to share-based compensation of **C$804,590**. As of April 30, 2026, the company held working capital of **C$539,488,** an accumulated deficit of C$54,672,768, and total assets of C$29,852,958. Management noted the company lacked sufficient financial resources to fund operations for the next twelve months and was pursuing additional financing. The company also closed a second tranche of a private placement and noted the Mining Inspectorate's March 2026 recommendation to approve the Norra Kärr Exploitation Concession application, now awaiting a final Swedish Government decision.

GRUVAKTIEBOLAGET VISCARIA · NASDAQ STOCKHOLM: VISC

Viscaria appoints Andreas Ridderström as Chief of Strategy and restructures management

18 September 2026

Gruvaktiebolaget Viscaria (Nasdaq Stockholm: VISC) announced the appointment of Andreas Ridderström as Chief of Strategy, Procurement & Project Control, effective 1 October 2026. Ridderström joins from the position of CFO of Zinkgruvan Mining, where he has been a member of the management team, and brings more than 20 years of experience in finance, business control and strategic development within the mining and industrial sectors. He will report to CEO Jörgen Olsson and serve on the newly formed Executive Management Team. Alongside the appointment, Viscaria introduced a new management structure, effective the same date, comprising an Executive Management Team and a broader Group Management Team, designed to establish clearer accountability and a stronger operational focus as the company transitions toward production start-up at the Viscaria mine in Kiruna.

TALGA GROUP · ASX: TLG

Talga Group signs graphite anode supply LOI with EAS Batteries

16 September 2026

Talga Group (ASX: TLG) announced the execution of a non-binding Anode Supply Letter of Intent with EAS Batteries GmbH, a German specialist lithium-ion cell manufacturer, to establish a strategic supply of graphite anode from the Vittangi Anode Project in Sweden. The LOI, signed in Berlin, establishes a structured pathway of product testing and qualification, targeting April 2027 to negotiate a binding terms sheet and July 2027 to execute a definitive five-year Supply Agreement. Key elements include joint work on product specifications, FEOC-free status, CO2 footprint and ESG metrics, a euro-denominated pricing mechanism, and mutual support for each other's project financing processes. Potential volumes remain under discussion, and the LOI creates no binding obligation on either party to purchase, sell or supply product.

FIREFOX GOLD CORP · TSXV: FFOX

FireFox Gold discovers Lammas Zone with 21.0 m at 4.13 g/t Au at Mustajärvi

16 September 2026

FireFox Gold Corp (TSXV: FFOX) announced the discovery of the Lammas Zone at its 100%-owned Mustajärvi Gold Project in Lapland, Finland. Discovery hole 26MJ032 intersected **21.0 m at 4.13 g/t Au from 114.0 m** depth, including 1.0 m at 21.6 g/t Au at 118.0 m, followed by 4.2 m at 3.41 g/t Au from 138.0 m, including 1.0 m at 7.22 g/t Au. The Lammas Zone lies approximately **750 to 950 metres** east-southeast of the East Zone, more than 650 m from any previous drilling, and is interpreted as a separate splay within the broader Mustajärvi Shear Zone system.

Two additional holes — 26MJ033, collared **60 m** southwest, and 26MJ035, collared approximately 200 m to the northeast — have been completed at Lammas with assays pending. The company plans to resume drilling on the structure in the coming weeks when winter conditions allow better access, while also advancing drilling at multiple other targets across the project toward a maiden resource estimate anticipated in early 2027.

FIREFOX GOLD CORP · TSXV: FFOX

FireFox Gold extends Northeast and Central Zones at Mustajärvi with high-grade intercepts

14 September 2026

FireFox Gold Corp. (TSXV: FFOX) reported assay results from seven drill holes completed at its 100%-owned Mustajärvi Gold Project in Lapland, Finland, extending mineralisation at both the Northeast Zone and Central Zone.

Hole 26MJ030, the first of a two-hole fence testing the western strike extension of the Northeast Zone, successfully extended the high-grade core over 50 metres to the west, returning **2.0 m at 44.65 g/t Au from 118.6 m** depth, 7.0 m at 11.36 g/t Au (with visible gold) from 199.0 m depth including 1.0 m at 57.9 g/t Au, and 11.5 m at 1.11 g/t Au from 125.6 m depth. Results remain pending for companion hole 26MJ042. At the Central Zone, holes 26MJ026 and 26MJ027 returned **3.95 m at 6.57 g/t Au from 68.5 m** depth and 3.1 m at 2.22 g/t Au respectively, extending that zone to the west at shallow depth. Three gap holes between the Central and Northeast Zones returned only narrow low-grade intervals. Total drilling at Mustajärvi now stands at **29,697 metres**.

KINGSROSE MINING LTD · ASX: KRM

Kingsrose Mining advances Penikat Area 6 permitting toward January 2027 drilling

15 September 2026

Kingsrose Mining (ASX: KRM) announced that permitting for the Area 6 portion of its Penikat PGE project in northern Finland is advancing toward a targeted January 2027 drilling start. The company submitted its Exploration Permit Application and Enforcement Order application to Finnish mining authority Tukes in July 2026; statements from environmental regulator LVV and state landowner Metsähallitus are expected in September, with public consultation feedback due in early October. Tukes intends to prioritise the Area 6 permit, with a determination expected in early December 2026. Following the mandatory 37-calendar-day appeal period, Kingsrose is targeting diamond core drilling in January 2027. Penikat carries an Exploration Target of **21–32 Mt** at 4.0–7.4 g/t 6E, for 2.8–7.7 Moz 6E.

CRITICAL METALS CORP · NASDAQ (US): CRML

Critical Metals reports >99% eudialyte dissolution and Romanian refinery study projections

16 September 2026

Critical Metals Corp (Nasdaq: CRML) announced further details of its mine-to-metals strategy for the Tanbreez Rare Earth Project in Greenland, including results from process development and a preliminary study for a proposed joint-venture refinery in Romania. Laboratory work achieved greater than 99% dissolution of eudialyte concentrate into 19 ultra-high-purity rare earth and critical metal

chloride salt products. Three process innovations are incorporated: multistage mixed-acid reactor additions to prevent silica gel formation, complete silica recovery targeting 99.99% SiO2 powder, and vacuum freeze-drying of all 19 chloride salts.

The proposed CRML Romania refinery is designed to process up to 100,000 tons per year of eudialyte concentrate, producing approximately 27,943 tons per year of rare earth and critical metal products and 25,670 tons per year of high-purity SiO2. Current modelling projects annual revenue of approximately **US$2.2 billion**, an NPV10 of approximately US$4.5 billion, an IRR of approximately 55%, and a payback period of approximately two years. Preliminary CAPEX is estimated at **US$1.85 billion** (±25%, Class 4). These projections are preliminary and subject to further engineering, test work, market conditions and feasibility studies.

ECLIPSE METALS LTD · ASX: EPM

Eclipse Metals to drill 17 holes at Grønnedal rare earth project

21 September 2026

Eclipse Metals (ASX: EPM) announced an agreement for a strategic 17-hole diamond drilling programme comprising **2,355 metres** at its 100%-owned Ivigtut–Grønnedal Project in South Greenland, scheduled to commence in October 2026. The programme follows the expansion of the Grønnedal Mineral Resource from **89 Mt** to 208 Mt at 0.72% TREO announced on 29 April 2026, which also established its first Indicated component.

Infill holes will test geological and grade continuity within selected parts of the **202 Mt** Inferred inventory, with individual hole depths ranging from 65 metres to 200 metres, while step-out holes will test mineralisation beyond the current resource limits. The resource contains an estimated **1.505 Mt** of TREO, including approximately 456,000 tonnes of contained Nd2O3 and Pr2O3. The project is located near deep-water port access associated with the historic Ivigtut mining district in South Greenland.

GREENLAND RESOURCES INC · CBOE CANADA: MOLY

Greenland Resources completes summer field program at Malmbjerg

17 September 2026

Greenland Resources Inc. (Cboe Canada: MOLY) announced the successful completion of its 2026 summer field program at the Malmbjerg molybdenum project in east-central Greenland on September 17, 2026. The expanded program involved 33 professionals from Austria, Canada and Greenland and included project-wide survey station establishment, glacier-geometry interpretation using seismic geophysics and drone-frequency technology, geotechnical inspection of the Mellem Valley, and optimisation of the Doppelmayr RopeCon transportation conveyor. **Greenland Resources** A/S also received a partial payment of **€163,025** (C$261 thousand) under the EU Horizon Europe BOREAS project. As part of Canada's **C$7 million** non-repayable contribution, consultants collected 8 tonnes of diamond drill core and 14 tonnes of water for metallurgical pilot plant testing at SGS Lakefield Vancouver.

GREENROC STRATEGIC MATERIALS PLC · AIM: GROC

GreenRoc reports 1.60 kg CO_2e/kg carbon footprint for Amitsoq graphite anode material

17 September 2026

GreenRoc Strategic Materials plc (AIM: GROC) announced the results of an initial cradle-to-gate climate change impact assessment for graphite active anode material from its Amitsoq Graphite Project in Greenland. An independent LCA specialist consultancy calculated a total climate change impact of 1.60 kg CO_2e per kg of coated spherical purified graphite (CSPG), placing it at the lower end of benchmark estimates from Benchmark Mineral Intelligence Ltd.'s 2024 AAM Plant Pre-Feasibility Study. Downstream CSPG processing accounts for approximately 87% of the total impact, with electricity used in micronising and shaping, coating and purification contributing 24%, 23% and 21% respectively. Mining and concentrate production contribute approximately 9%, and intermediate transport approximately 4%.
