ARCTIC MINERALS AB · NASDAQ FIRST NORTH: ARCT

Arctic Minerals completes maiden drilling at Hennes Bay with copper in ten holes

22 September 2026

Arctic Minerals AB (First North: ARCT) announced the successful completion of its maiden drilling programme (DP1) at the Hennes Bay copper-silver project in Sweden. Twelve holes totalling **4,187m** were drilled, with ten of twelve intersecting visible copper mineralisation in the form of bornite, chalcocite and/or chalcopyrite, including step-out holes up to 600m from historical drilling. Seven of the holes with visible copper were drilled at the Åsnebo, Baldersnäs, Henneviken and Asslebyn prospects — historically drilled to **2,381m** — with the objective of providing sufficient data to add these prospects to the current Mineral Resource Estimate (MRE). The existing MRE, based solely on

the Dingelvik prospect, totals **55.4 Mt** at 1.0% CuEq (0.8% Cu and 20.8 g/t Ag) for 543,000 t CuEq contained metal. Three further holes with visible copper were drilled at Dingelvik with step-outs of up to **500m** to the east and south of the existing MRE. Assay results are expected within a month. A second drilling programme (DP2), comprising 20 holes for **8,000m** targeting regional anomalies defined by a 2025 MMT survey, has commenced immediately following DP1.

SINCLAIR GOLD · ASX: SGC

Sinclair Gold publishes annual report for financial year 2026

24 September 2026

Sinclair Gold (ASX: SGC) announced its annual report for the financial year ended 30 June 2026. The company completed the acquisition of the Mt Henry Gold Project in February 2026, raised **A$30 million** to accelerate exploration, and rebranded as **Sinclair Gold** during the period. Mt Henry hosts a JORC (2012) Mineral Resource of **24.5 Mt** at 1.2 g/t Au for 915,000 oz Au across the Selene (651,000 oz), Mt Henry (232,000 oz) and North Scotia (12,000 oz) deposits. As at 30 June 2026, approximately

12,300 metres of a planned 50,000-metre programme had been completed, with mineralisation extended 125 metres down-dip at Selene and 150 metres down-dip at Mt Henry. In Sweden, an earn-in agreement was signed over the Falun project, and Medaro Mining Corp. (CSE: MEDA) entered a binding agreement to earn into the Sala project.

TALGA GROUP · ASX: TLG

Talga Group and Fortum sign graphite MoU for European battery chain

13 September 2026

Talga Group (ASX: TLG) announced that its Swedish subsidiary Talga AB has signed a non-binding Memorandum of Understanding with Fortum Battery Recycling Oy, a Finnish battery recycler, to explore strategic opportunities across the European graphite and battery materials value chain. The MoU establishes a framework to evaluate supply of graphite recovered from Fortum's recycling operations for refining into battery anode materials by Talga, and joint development of blended anode materials combining primary and recycled graphite streams. The parties are also discussing power supply and energy solutions to support the Vittangi Anode Project, leveraging Fortum's low-carbon electricity portfolio. Indicative volumes target 400 tpa from 2029, ramping to 10,000 tpa by 2034, with a long-stop date of 31 December 2033. Any binding agreements remain subject to further due diligence and board approvals.

FINNISH MINERALS GROUP

Finnish Minerals Group publishes legal assessment on Kotka construction site labour practices

25 September 2026

Finnish Minerals Group announced the completion of an independent legal assessment, carried out by law firm Castrén & Snellman, into employment practices at the Kotka CAM plant construction site in Finland. The assessment found that employment contracts for Chinese installation workers broadly complied with the Finnish construction sector collective agreement, but communication around contract amendments was unclear and not all employees had provided consent to changes. Some workers had signed agreements requiring repayment of wages to a foreign staffing agency, which would reduce earnings below Finnish collective agreement minimums. Meal and accommodation cost

deductions were lawful in principle but had not been agreed with workers in writing. China Harbour committed to ensuring all employees receive remuneration in accordance with Finnish employment terms, with some unpaid wages already settled.

OUTOKUMPU · NASDAQ HELSINKI: OUT1V

Outokumpu launches EvoMaterials platform for low-carbon metals

24 September 2026

Outokumpu (Nasdaq Helsinki: OUT1V) announced the launch of EvoMaterials®, a new technology brand built on sulphidation-based process technology aimed at producing low-carbon, high-purity metals. Starting from ferrochrome and chrome metal — with potential to extend to nickel and molybdenum — the platform targets aerospace, aviation and defence applications and is intended to support a fully Western supply chain for critical chromium materials. Development began in 2021 in the United States using chromite from the Kemi mine, the EU's only chromium mine, supported by a non-exclusive patent licence from MIT. A pilot facility in Londonderry, New Hampshire, scaling production from one kilogram to one tonne, is scheduled to come online in the first half of 2027, with an industrial-scale plant targeted for 2030.

80 MILE PLC · AIM: 80M

80 Mile plc amends Jameson JV, receives £500,000 from GLND

24 September 2026

80 Mile plc (AIM: 80M) announced that it has executed an extension letter with its joint venture partner March GL Company in relation to the Jameson liquid hydrocarbon project in Greenland. Under the terms of the extension, March GL Company will novate its rights and obligations under the JV agreement to Greenland Energy Company (GLND) following an internal reorganisation. GLND will assume sole responsibility for obtaining and maintaining all permits and licences required for Jameson Project 1 and Project 2. The longstop date for drilling the first exploration well has been extended from 31 December 2026 to 31 December 2028, and the longstop date for the second exploration well from 31 December 2027 to 31 December 2028. In consideration for the amendments, GLND will pay **80 Mile £500,000** in cash on signing.

GREENLAND RESOURCES INC · CBOE CANADA: MOLY

Greenland Resources welcomes Greenland–Denmark–US defence agreement

21 September 2026

Greenland Resources Inc. (Cboe Canada: MOLY) welcomed a recent defence agreement among Greenland, Denmark, and the United States, which it believes will strengthen security and encourage investment in Greenland minerals. The company noted existing binding long-term offtake agreements with Outokumpu and SSAB, and highlighted that its Feasibility Study uses a molybdenum price of

US$18 per pound against a current market price of approximately US$33 per pound. The company also announced it will present at the Think Equity Conference on 15 October at the Mandarin Oriental Hotel in New York, where it will hold one-on-one meetings with investors.

Drilling tracker · Financings · Permits

Earlier in September — Energy Transition Minerals Ltd (ASX: ETM) reported a widened first-half loss and began winding down its Kvanefjeld exploration programme after the Greenland government declined to extend the licence. The company also won a High Court ruling in Greenland that removed the Parliament and the Self-Government from the list of defendants in its subsidiary's case over the same project.
